VIRGINIA MILITARY INSTITUTE.
MATHEMATICAL SERIES,
By Col. FRANCIS H. SMITH.

SUPERINTENDENT OF THE VIRGINIA MILITARY INSTITUTE.

PUBLISHED BY

THOMAS, COWPERTHWAIT & CO.,
No 253 Market Street, Philadelphia,

And for Sale at the Principal Book Stores of the United States.

INTRODUCTION TO SMITH AND DUKE'S ARITHMETIC,

By FRANCIS H. SMITH, A. M.

AMERICAN STATISTICAL ARITHMETIC,

DESIGNED FOR ACADEMIES AND SCHOOLS,

By FRANCIS H. SMITH, A. M.,

Superintendent and Professor of Mathematics in the Virginia Military Institute ; late Professor of Mathematics in Hampden Sidney College, and formerly Assistant Professor in the United States Military Academy, West Point, and R. T. W. DUKE, Assistant Professor of Mathematics in the Virginia Military Institute. Third Edition.

Key to Smith and Duke's American Statistical Arithmetic,

PREPARED BY WILLIAM FORBES,

Assistant Professor of Mathematics in the Virginia Military Institute.

SMITH'S ALGEBRA.

An Elementary Treatise on Algebra, prepared for the use of the Cadets of the Virginia Military Institute, and adapted to the present State of Mathematical instruction in the Schools, Academies, and Colleges of the United States. By FRANCIS H. SMITH, A. M.

SMITH'S BIOT.

An Elementary Treatise on Analytical Geometry. Translated from the French of J. B. BIOT. By FRANCIS H. SMITH, A. M. Revised Edition.

REMARKS.

THE VIRGINIA MILITARY INSTITUTE was established, and is supported by the State of Virginia. An arsenal, containing 30,000 stand of arms, is located here, which was formerly guarded by a company of enlisted soldiers, at an annual expense of about \$6,000. In 1839, this appropriation was transferred to the support of a company of cadets, who, in addition to their duties as a guard, should also be placed under a course of instruction, upon the basis of the United States Military Academy, at West Point. Upon this new system the Institute has been in successful operation for twelve years. The cadets admitted consist of two classes, *State* and *Pay* cadets. The Institute supplies to the State cadet his board, tuition, fuel, lights, books, mattrass, medical attendance and stationery; and in consideration thereof, he is required to teach two years after graduation. The Pay cadet is at his own expense, which averages \$300 per year, for every charge, *including clothing*. The State cadets are selected from those who are unable to bear their own expenses. The Institution has always had as many pupils as its buildings would accommodate, and numbers *thirty-two* State and *one hundred* Pay cadets. Applications are made, by letter, to the Superintendent prior to the first of July, each year, and appointments are made for both classes of cadets,

by the Board of Visitors, respect being had to their due apportionment among the several districts of the State.

The Literary Fund of the State contributes \$1,500 per year to the Institute for the education of teachers, and the State has received tuition fees from the pay cadets to the amount of \$25,000 since its organization, which sum is applied to the increase of the number of State cadets, and to the enlargement of the accommodations of the Institute, and to the support of a part of the corps of Professors.

INSPECTOR—(EX-OFFICIO.)

His Excellency Joseph Johnston, Governor of Virginia.

BOARD OF VISITORS.

COL. WM. B. TALIAFERRO,	<i>President,</i>	Gloucester.
GEN. WM. H. RICHARDSON,	<i>Adjutant Gen'l,</i>	(ex-officio.)
GEN. DOUGLAS B. LAYNE,	.	Alleghany.
WM. SEYMOUR, Esq.	.	Hardy.
BENJ. F. GARRETT, Esq.	.	Halifax.
COL. BENJ. RUSH FLOYD,	.	Smyth.
DR. A. R. SMITH,	.	Norfolk Co.
JUDGE W. W. CRUMP,	.	Richmond.
COL. A. I. SMITH,	.	Harrison.

ACADEMIC STAFF.

COL. FRANCIS H. SMITH, A. M., Superintendent and Professor of Mathematics.

CAPT. J. G. GAMBLE, Assistant Professor of Mathematics, and Assistant Instructor of Tactics.

CADET S. CRUTCHFIELD, (First Class) Acting Assistant Professor of Mathematics.

MAJOR J. T. L. PRESTON, A. M., Professor of Languages and English Literature.

LIEUT. G. H. SMITH, Assistant Professor of Languages, and Assistant Instructor in Infantry Tactics.

CADET L. T. W. PATTON, (First Class,) Acting Assistant Professor of Languages.

MAJOR T. H. WILLIAMSON, Professor of Engineering and Instructor of Drawing.

MAJOR WILLIAM GILHAM, A. M., Professor of Chemistry, and Instructor of Infantry Tactics and Commandant of Cadets.

MAJOR THOMAS J. JACKSON, Professor of Natural and Experimental Philosophy and Instructor of Artillery.

MAJOR R. E. COLSTON, Professor of French Language.

MILITARY STAFF.

H. M. ESTILL, M. D., Surgeon.

R. E. COLSTON, Treasurer.

LIEUT. G. H. SMITH, Adjutant.

R. H. CATLETT, Quarter Master.

J. T. GIBBS, Commissary and Steward.

FIRST CLASS, (GRADUATES)—1855.

Fourth Year.	First Class.	Geology and Mineralogy. Military and Civil Engineering. Tactics, Infantry and Artillery. English Literature. Rhetoric and Logic. Geography. Agricultural Chemistry. Moral Philosophy and Constitutional Law.	Hitchcock and Norton. Mahan and Lectures. Scott. Chambers and Lectures. Blair and Whateley. Mitchell. W. Norton. Paley and U. S. Constitution.

EXPLANATION OF CONDUCT ROLL.

All offences against Orders or Regulations are recorded.

These offences are divided into seven grades ; each of which comprises offences of nearly the same degree of criminality. The degree of criminality of offences of each grade is expressed by a number, as follows :

Offences of the 1st grade by 10

Do	"	2d	"	8
Do	"	3d	"	5
Do	"	4th	"	4
Do	"	5th	"	3
Do	"	6th	"	2
Do	"	7th	"	1

For each year (after the first year) that a Cadet has been a member of the Institute, his offences are made to count more, by adding to the number expressing the degree of criminality, of each offence, one-sixth for the second class—and one-third for the third class—and one-half for the first class.

At the end of the Academic year, these numbers are added up, and the sum thus obtained is that found in the column of "*demerit*."

When a Cadet has more than 100 demerit by the 1st of January, or 200 in one year, he is dismissed *ipso facto*.

NEW APPOINTMENTS—1855.

Names marked thus [*] most distinguished of their class—those with [†] signify death.

NOTE.—Graduates are requested to notify the Superintendent of any errors in the above Catalogue.

§ Cadet E. J. Harvie having been appointed a Lieutenant in the U. S. Army a short time before his class graduated, but having completed the studies of his class, he was graduated without class standing.

N. B.—A general meeting of the Alumni is specially requested at the Institute, on the 3d of July next. JAMES W. MASSIE, Esq., orator for the occasion.

VIRGINIA MILITARY INSTITUTE.

Lexington, Va., July 4, 1855.

By order of Col. E. H. SMITH,

GEO. H. SMITH.

ADJ. V. M. I.

NOTICES OF SMITH'S STATISTICAL ARITHMETIC.

From the Board of Directors of the Literary Fund, Virginia.

The Board of Directors of the Literary Fund having examined Smith and Duke's American Statistical Arithmetic, composed by Francis H. Smith Esq., Superintendent and Professor of Mathematics in the Virginia Military Institute, take pleasure in recommending the work, especially for the purpose for which it is designed, "to prepare beginners for the study of the more advanced parts of the science." The plan of inculcating valuable statistical information in the illustration of arithmetical rules is not only novel and attractive, but useful, and is doubtless calculated to make a strong impression on the minds of youth.

A true extract from the minutes.

(Signed.)

J. BROWN, Jr., Second Auditor.

Office of the Literary Fund Board, Va.

From J. H. Brown, A. M., Principal of Zane St. School, Philad.

It was with much pleasure that I examined the American Statistical Arithmetic by Smith and Duke, and an introduction to the same, by Francis H. Smith, A. M., both published by you. They are works of more than ordinary merit. With clear and definite Rules, they convey a large amount of valuable information not usually within the reach of students of Arithmetic. Their general introduction will aid the cause of sound instruction in the Schools and Academies of our country.

Extract of a letter of Prof. Powers, of Virginia University.

I consider it decidedly the best Arithmetic I have seen, not only as regards the valuable statistical information it contains, but also in its arrangement, and the very clear and simple explanation of the rules which it gives.

Notices of Smith's Algebra.

This work is designed to present as complete an Elementary course of Algebra, as the time devoted to the study of Mathematics in the Colleges of our country will allow; while it will be equally within the comprehension of the pupil of the High School or Academy.

In preparing this work, the author has adopted those explanations and demonstrations which an experience of many years in teaching, and a careful comparison of standard authors have shown to be best. Without following the system of any other writer, he has derived important aid from the works of *Garnier, Bezout, Reynaud, Bourdon, Lacroix, Francœur, Euler, Hutton, Thompson, Goodwyn, Scott*, and the *Encyclopædia Metropolitana*. Many of his examples have been selected from the valuable edition of Hutton's Mathematics, by Professor Rutherford, of the Royal Military Academy, Woolwich.

This work covers the full course of Davies' Bourdon, and contains a new and beautiful demonstration of the Binomial Theorem in the case of an Exponent, by Prof. Pike Powers, late of the University of Virginia.

From Prof. P. Powers, late Professor of University of Virginia.

I have been using your Algebra for nearly twelve months, and can truly say it answers my purpose better than any other I am acquainted with. It presents the leading principles of the science in a concise and simple form, and especially those higher principles which give beginners most trouble, so that I have never had my classes master them before with so little difficulty.

From Prof. W. N. Pendleton.

The work which you have translated, I have, ever since becoming familiar with it, regarded it as a masterpiece in that department of mathematical science—indeed my feelings respecting it have always partaken much of the enthusiastic. It bears the evident stamp of genius, and embodies more of the beauties of ingenuity, simplicity, and generalization, than any other work of that class of subjects with which my mathematical studies have made me acquainted.

From the Virginian, Winchester, Va.

A new Algebra, by Col. Francis H. Smith, the highly efficient and esteemed Superintendent of our Military Institute at Lexington, will require no eulogy of ours, in view of the rapid and entire success of the author's previous work, the Statistical Arithmetic. This work has all the *prestige* a city publisher can give it, and Virginians have thus all they demand before giving their encouragement to home productions. No Virginia school-boy will lose much by being *minus* Bonnycastle and *plus* Smith.

Notices of Smith's Biot's Analytical Geometry.

From Prof. John B. Strange, Norfolk Academy.

I have seen your Algebra, and, after a careful examination of it, I do not hesitate to pronounce it an excellent work—the best on the subject that I have seen. I shall, therefore, adopt it immediately in the Academy. I am so much pleased with all your mathematical works which have appeared, that I trust your labors in this department will not cease until you have completed the whole course.

From A. W. Millspaugh, Principal of the Classical School, Farmville.

It gives the definitions and some of the most abstruse parts of the science with greater clearness and perspicuity than any similar work with which I am acquainted—and I also think the copious examples given a great desideratum.

From Prof. Saunders, of William & Mary College.

I have long lamented the defect in logical arrangement of most of the principal treatises on the subject of Analytical Geometry, with regard to one of its most important applications—*Conic Sections.*. The student is informed that they are Conic Sections, because they result from the intersection of a plane in different positions with the surface of a cone, but he is put in possession of their properties before any proof is given to him that they are what they are called. The very last step usually is, to show that they are Conic Sections. The treatise of *Biot* comes precisely up to my idea of the proper arrangement in this respect.
